

QUIZ 3 - SOLUTION

NAME:

Complete the following program as directed by the comments.

```
#include<iostream>
#include<fstream>
using namespace std;

int main () {
    ifstream inFile("names.txt", ios::in);

    if (inFile.fail()) { // "if (!inFile)" also acceptable
        cerr << "names.txt could not be opened." << endl;
        exit(1);
    }

    char *firstname = new char[30];
    char *lastname = new char[30];

    while (!inFile.eof()) {

        inFile >> firstname >> lastname;

        cout << firstname << " " << lastname << endl;
    }

    inFile.seekg(0);
    inFile.close();

    return 0;
}
```
