

In this assignment, you will review three project status reports and give the group feedback.

The first step is to find out which status reports you will review. Open the file `aa_status_report_peer_review.csv` in the status report folder on Canvas. Find the last two letters + all digits of your net ID in the first column -- you are assigned to review the three status reports in that row. You can find all the status report documents in the 'status report' -> 'status report peer reviews' folder. In addition to turning in your review, you must also **send the review via e-mail** to at least one of members of the team you reviewed. Use the group id in the PDF file name, along with the [NU Directory](#) or Canvas, to find contact information for one of the students. Note that you can find all members of a group on Canvas in `people->groups`.

How to provide peer review for EECS349 project status report:

1. Download and install: [Adobe Acrobat Reader DC](#)
2. Open project status report PDF file using Adobe Acrobat Reader DC
3. Like peer review of proposal, there are four aspects you need to provide your reviews. Here are some questions for each of them you may want to think before given your reviews.
 - a. Topic: Do they adjust their topic? Is the current task clear in terms of its inputs and outputs?
 - b. Dataset: Is their dataset ready to train a ML model?
 - c. Result: Do they have preliminary result? If yes, how does their preliminary result looks like? If no, is their task too hard? How can you help them?
 - d. Plan: Given their current progress, which parts of the group's plan would you prioritize? Do you have other suggestions for putting finishing touches on the project?
4. Now, provide your reviews on these four aspects like what you did on proposal
 - a. Highlight a span of text, Right click on the highlighted sentence and input your review in pop-up notes, format is similar to proposal peer review.
 - i. Topic: review
 - ii. Dataset: review
 - iii. Result: review
 - iv. Plan: review
 - b. If you have other questions, concerns, or suggestions regarding the work the group has done so far. Feel free to add comments on whatever you want by highlighting a sentence and add 'Open Pop-Up Note'.
 - c. If you have global comments, input your comments using sticky note. Right click anywhere, add 'Add Sticky Notes'

- d. Last step, add a sticky note which only contains the email address that you send your peer reviews to.

It is possible, although unlikely, that you will be assigned to review your own status report. In that case, go ahead and review your own proposal (self-review can be very valuable).

Due date: May 30

Submission Instructions

For each of the three peer reviews you are assigned, you should email your peer review to one of the group members and upload a single zip file containing your three annotated PDFs on Canvas.
